

Welcome to Ignyte's Wireframes!

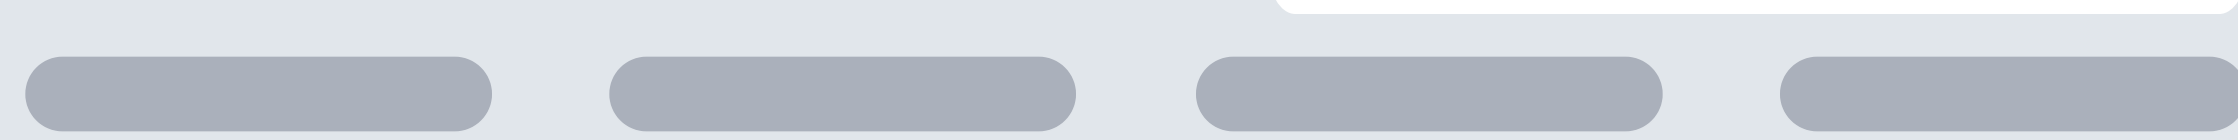

On behalf of Ignyte Group, we are honored to present the wireframes for our submission to the ED.gov Redesign Challenge.

We took a user-centric and design-forward approach to reimagine ED's online presence. Our wireframes (created in Adobe XD) were developed based on modern design principles, U.S. Web Design Standards, and input from local educators, students, and school officials.

They served as the basis for our six (6) page WordPress prototype, and we believe they effectively convey ED's mission of educational excellence by optimizing the placement of information, imagery, and calls-to-action.
